PROFESSIONAL SUMMARY

ECE undergraduate with hands-on experience building AI/LLM applications, backend systems, and automation workflows. Developed 4+ production-grade Python applications, integrated LLM APIs (OpenAI, Gemini), and deployed full-stack platforms including a live Android app. Seeking roles in Backend Engineering, AI/ML, or Full-Stack Development.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, C++, SQL

Backend & APIs: FastAPI, Django, Flask, REST APIs, Node.js, Docker, Microservices

AI/LLM: OpenAI API, Google Gemini API, LangChain, Prompt Engineering, n8n, Agentic Workflows

Data Engineering: Apache Kafka, BeautifulSoup, Scrapy, ETL Pipelines, Data Processing

Databases: MongoDB, PostgreSQL, Redis, Supabase, IPFS, GunDB

ML/Data: BERT, XGBoost, NLP, Machine Learning, Classification Models

Other: Git/GitHub, React, Capacitor, Solidity, Blockchain, ZK-SNARKs, IoT (ESP32)

PROFESSIONAL EXPERIENCE

Aethel Labs — AI Automation Agency (Remote)

2024 – Present

Freelance AI Automation Engineer

- Designed and deployed 6+ LLM-powered backend systems for clients across AI, Web3, and SaaS sectors
- Built agentic AI workflows using Python and n8n, reducing manual client operations by 40%
- Managed production deployment lifecycle for multi-client projects using Docker and cloud services

Growth Magnet Studio (Remote)

Dec 2024 – Feb 2025

AI & Automation Intern

- Engineered 8+ AI-driven automation workflows using n8n and Python for client portfolio
- Automated lead generation and onboarding processes, reducing manual workload by 35%
- Built LLM API integration pipelines for intelligent data processing and decision-making

Technominds IP Solutions (Remote)

Oct 2024 – Dec 2024

Business Analyst Intern

- Developed prospect pipeline using data-driven approaches, qualifying 50+ leads
- Analyzed client acquisition data to identify market trends and growth opportunities

PROJECTS

AyurChain — Blockchain Herb Traceability Platform | Python, FastAPI, Solidity, Polygon, IPFS, IoT

- Built full-stack supply chain platform with Python/FastAPI REST APIs and Polygon blockchain for immutable herb records
- Integrated 50+ IoT sensors (ESP32/DHT22) for real-time data collection and processing pipelines
- Implemented Gemini AI assistant with prompt chaining and ZK-SNARKs (Groth16/circom) for on-chain privacy verification

Stability OS — Behavioral Regulation Mobile App (Live APK) | React, Capacitor, Supabase, Dexie, Zustand

- Shipped cross-platform Android app (live APK) implementing a 5-state time-machine behavioral engine using React + Capacitor
- Designed offline-first architecture with Dexie (IndexedDB) syncing to Supabase PostgreSQL backend with zero-latency UI
- Built smart lock system, urge-interruption protocols, and failure-recovery workflows within a modular component architecture

Multi-Platform AI Trend Predictor — Rising India Hackathon 1.0 | Python, Kafka, FastAPI, BERT, XGBoost

- Architected real-time data streaming system using Apache Kafka for multi-platform social data ingestion
- Implemented BERT-based NLP classification pipeline and XGBoost virality scoring on 10K+ daily data points
- Deployed FastAPI backend with REST endpoints for real-time inference serving and end-to-end ETL pipeline

EDUCATION

Prof. Ram Meghe Institute of Technology and Research (PRMIT&R), SGBAU

Expected 2027

B.Tech in Electronics & Telecommunication | Minor in Computer Science

LEADERSHIP & ACHIEVEMENTS

Entrepreneurship Cell, PRMIT&R | Vice President

2025 – Present

- Lead cross-functional team of 45 members organizing 8+ tech and entrepreneurship events annually
- Achieved 25th rank among 9,000 teams at NEC'25 (IIT Bombay) engineering competition
- Mentored 10+ students in Python, AI, and cloud development projects
